- We had a spirited discussion (again) of the academic misconduct policy. We compared what we do to what is done by our peer and aspirant institutions. We discussed all of these issues and decided to form a summer working group with staff from Community Standards and SSC members to discuss all aspects of academic misconduct. Joe will schedule the meetings over the summer.
- We met and discussed the CSD rules on attendance with no significant input.
- We addressed the question as to whether syllabi should include information about mental health facilities for students. We thought that this type of information can be better delivered through other offices and resources than the syllabi.

We adjourned at 3:30 p.m.
